(a) Source

(b) Request response E

(c) Executed protection P

(d) Edited: CORR25

Request: field → forest. Sample 000000000100 / seed 0. $P = 0.25 + 0.75(1 - E)$.

Archived maps: white = high E / high P; E is 64 × 64, P is a 320 × 320 saved preview.

Source, maps and edited image are archived JPEG previews; maps are not inferred from the output.
